Why Biologicals?

Healthy soil is full of life. Verdant's products use beneficial microbes and natural compounds to help crops absorb more nutrients and resist disease, so you can reduce chemical inputs without giving up yield.

- Backed by 2,000+ field trials a year
- Compatible with standard farm equipment
- Registered in 22 countries
- No waiting period before harvest

Since 2016

Verdant
LABS

Growing more with less, naturally.

Biological crop solutions that raise yields and protect the soil.

VERDANT-LABS.EXAMPLE

01

Our Products

VerdaRoot

A microbial seed treatment that boosts root growth and nutrient uptake. Applied with your usual seed-coating process.

VerdaShield

Biological crop protection derived from natural fungi. Effective against common foliar diseases and gentle on beneficial insects.

SoilSense

Field sensors and satellite maps showing moisture, nitrogen and microbial activity, zone by zone.

02

Proven Results

6-9%
average yield gain

20%
less fertilizer used

2,000+
field trials each year

31
countries served

How it works

- Test: map your soil with SoilSense
- Treat: apply VerdaRoot at planting
- Protect: spray VerdaShield when needed
- Adapt: follow weekly advice in our app

03

Get Started

Every farm is different. Our agronomists will visit your fields, review your soil data and recommend a plan sized to your acreage and crops.
