Verdant
LABS

COMPANY PROFILE | AGRITECH & BIOLOGICAL CROP SOLUTIONS

Growing more with less, naturally

Verdant Labs develops microbial seed treatments, biological crop protection and soil-sensing technology that help farmers raise yields while cutting reliance on synthetic chemicals.

FOUNDED	HEADQUARTERS	EMPLOYEES	REVENUE FY2025	OWNERSHIP
2016	Wageningen, NL	420	$94M	Venture-backed

Hypothetical company created for illustrative purposes. Any resemblance to real organizations is coincidental.

Company Overview

Verdant Labs began in 2016 as a university spin-out focused on beneficial soil microbes. It now develops and sells biological products and digital tools to growers of maize, soybean, wheat, rice and vegetables in 31 countries.

Its products are tested in more than 2,000 on-farm trials a year, and independent studies show average yield gains of 6 to 9% alongside a 20% reduction in fertilizer use. In 2024 the company reached its first operating profit, a milestone for a business that invests roughly a fifth of revenue in research.

> ***Mission***
> *To help the world's farmers feed more people while restoring the land they depend on.*

Core Values

Science
Every claim is backed by replicated field data.

Stewardship
We measure success by soil health as well as yield.

Farmer First
Products must pay back for the grower within one season.

Transparency
Trial results are published, including the disappointing ones.

Milestones

2016	Founded as a university spin-out in Wageningen.
2018	First field trials across six countries.
2020	VerdaRoot seed treatment launched commercially.
2022	$85M Series C raised; SoilSense sensor range introduced.
2024	First full year of operating profit.
2025	Customers in 31 countries; revenue reaches $94M.

Products and Services

VerdaRoot
Microbial seed treatment that boosts root growth and nutrient uptake, compatible with standard seed-coating equipment.

VerdaShield
Biological crop-protection spray derived from naturally occurring fungi, with no waiting period before harvest.

SoilSense
In-field sensors and satellite analytics that map moisture, nitrogen and microbial activity zone by zone.

Verdant Advisory
Mobile agronomy app that turns sensor and weather data into weekly, field-specific recommendations.

Market Position

Biologicals are among the fastest-growing segments of the crop-inputs market as regulators tighten limits on synthetic chemicals and buyers seek lower-residue produce. Verdant competes with large agrochemical companies and specialist biotech firms.

Competitive strengths

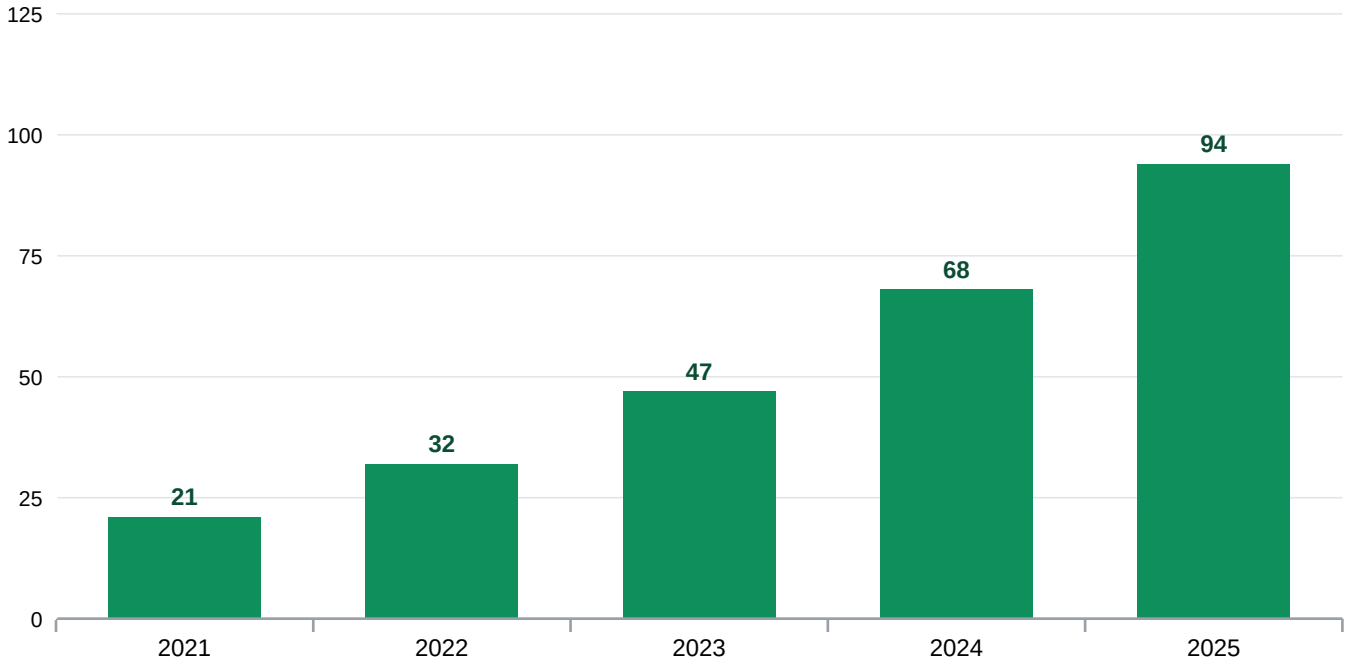

- Broad portfolio spanning seed, protection and data in one offering
- Registrations approved in 22 countries, with 9 more pending
- Distribution partnerships with 40 regional cooperatives
- Subscription revenue from Advisory growing above 60% a year

Financial Snapshot

Figures in US$ millions, fiscal years ending December. All figures are hypothetical.

Fiscal year	Revenue ($M)	Growth	Operating margin	Net income ($M)
2021	21	-	-38%	-8.0
2022	32	52.4%	-24%	-7.7
2023	47	46.9%	-11%	-5.2
2024	68	44.7%	2%	1.1
2025	94	38.2%	9%	7.4

Revenue by fiscal year ($M)

Commentary

Revenue has grown at around 45% a year as new registrations and distributors came online. Losses narrowed each year and the business turned profitable in 2024 as manufacturing scale improved gross margin.

Leadership Team

Dr. Amara Nwosu
Chief Executive Officer and Co-founder

Soil microbiologist with 18 years in agricultural research and commercialization.

Lars Vandenberg
Chief Science Officer

Leads discovery, field trials and regulatory science across all markets.

Sofia Alvarez
Chief Financial Officer

Former agribusiness finance executive; led the Series C round.

Kenji Watanabe
Chief Operating Officer

Oversees fermentation plants, supply chain and distributor relations.

Strategic Outlook

- Commission a second fermentation facility in 2027 to double output capacity.
- File for registration of two new biofungicides in North America and Brazil.
- Expand SoilSense into carbon-credit measurement for regenerative farmers.
- Maintain growth above 30% while sustaining positive operating margin.
